## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### DETAILED ACTION

Claims 1-13 and 24 are pending and are considered on the merits.

#### *Claim Rejections - 35 USC § 112*

##### INDEFINITE

Claims 1-13 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The method claims have no active steps such as "applying a medicament comprising ...Q<sub>10</sub> to the cornea of the eye of the subject", rather merely stipulate the "use". The claims provide for the use of CoQ<sub>10</sub>, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

The method claims have no recipient of the the action such as, "A method for treating a subject having pathology of the anterior chamber of the eye or incidental or post-surgical trauma of the anterior chamber of the eye comprising: applying...".

Claim 11 requires that the castor oil be modified, but fails to specify what the modification is. The word "modified" is not defined in the specification and is not a term of art with regard to chemical compounds.

#### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action: (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made

Art Unit: 1651

in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-10 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 99/11242 [L].

The claims are directed to the use of CoQ<sub>10</sub> to prevent and treat pathologies of the eye. The claims do not require that the CoQ<sub>10</sub> be topically applied to the eye. The claims do not require that the eye be post-surgical, but rather can be read to require only the use of CoQ<sub>10</sub> to prevent damage from exposure to the sun. All eyes could benefit from this result. Therefore, because the claims are so indefinite, any use of CoQ<sub>10</sub>, orally administered or otherwise could prevent damage to the eye from exposure to the sun and any administration is considered to read upon the claims. Please note that claims 5-9 do not REQUIRE that the eye be post-surgical, only that if it were post-surgical, the surgery would be a LASIK type treatment, for example.

Claim 10 does not require that CoQ<sub>10</sub> be administered topically, only that the composition is a topical formulation.

The references are relied upon as explained below.

WO 1999/11242 teaches the administering of CoQ<sub>10</sub> intraocularly. The inherent result of this administration would reasonably be expected to be the same result as obtained by the claimed method since the claimed method only requires the use of CoQ<sub>10</sub> to prevent damage induced by the sun. Patients administered the composition of example 2, page 8, intraocularly (abstract) would obtain this benefit as an inherent result of the method. The claims require nothing more.

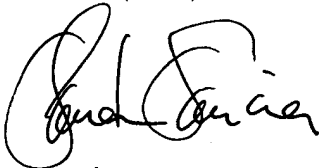

One of ordinary skill in the art would have been motivated at the time of invention to perform the claimed method as suggested by the reference with a reasonable expectation of success. The claimed subject matter fails to patentably distinguish over the state of the art as represented by the cited references. Therefore, the claims are properly rejected under 35 U.S.C. § 103.

Claims 11-13 appear to be free of the art.
